Conference Speaker

Bob Doran

Bob has taught *Property and Evidence Management* classes for the past 23 years. Has served as a consultant to numerous police and sheriff's departments throughout the United States and has conducted over 40 evidence room audits and studies. He has been retained as an expert witness in several federal, civil and criminal cases. Has experience developing and writing comprehensive police policy and procedures manuals.

Bob wrote the textbook, *Evidence and Recovered Property: the Police property Control Function*. This book has become the standard for property and evidence control throughout North America and many foreign countries.

He has taught evidence and property management throughout the United States including past NAPE Conference. Also has taught at California Association for Property and Evidence (CAPE), Illinois Association (IAPEM), Colorado Association (CAPET), Northwestern University Public Safety Institute and numerous training police academies.

Is your storage room a mess?

Know where all your guns are?

Does your department consider evidence or property a sideline?

Are you looking for more information?

Could you use some help in planning, organizing, purging, or updating your evidence facility?

Do you hope there is a better way to enter, keep and control data and records?

Take advantage of this conference to find answers to your questions and to meet others dealing with similar issues!
